Overview

Professional Rotary Tiller

The Mod.IGN series is a versatile rotary tiller engineered for efficient soil preparation and cultivation in diverse agricultural environments. Designed for compatibility with tractors requiring lighter implements, it is an ideal choice for vineyards and orchards where precision is essential. These machines effectively break up and aerate soil to create optimal seedbeds, featuring robust construction and adjustable settings to meet specific crop and soil requirements.

Product Series

Available Model Variants

- IGN90
- IGN105
- IGN125
- IGN135
- IGN150
- IGN180
- IGNH135
- IGNH150
- IGNH180

Model Configuration

Standard, Hydraulic Side Shift

Applications

Best Suited For

Vineyards, Orchards, Demanding Crops, Soil Preparation, Seedbed Creation

Features

Key Performance Features

- Adjustable tilling depth and intensity
- Durable heavy-duty construction
- Suitable for various soil types
- Low maintenance design for high productivity
- Hydraulic side shift options available
