

Rotary Tiller for Soil Preparation

This product is for hard work and site preparation types of agricultural machinery, mainly for dry land, paddy field of rotary operation.

Product Overview

Versatile Soil Preparation Solution

This diesel-powered rotary tiller is designed for high-performance soil preparation in both dry land and paddy fields. It features an all-gear drive system that minimizes power loss while providing superior tillage effects across varied terrain. The compact and robust construction ensures reliability and ease of maintenance, making it an ideal choice for plains, hilly areas, orchards, and vegetable plots.

Technical Specifications

| | |
|---------------|---------|
| Tillage Width | 1350 mm |
| Tillage Depth | 100 mm |
| Weight | 132 kg |
| Productivity | 50 ha/h |
| Power Source | Diesel |

Features & Capabilities

Key Features

- All-gear drive system
- Ductile iron gearbox for high intensity
- Wet friction plate clutch for easy shifting
- Versatile multi-functional support
- Compact and flexible design

Ideal Environments

Dry Land • Paddy Fields • Orchards • Vegetable Plots • Tea Plantations

Compatible Operations

Pumping, Power Generation, Spraying, Trenching, Short-distance Transport
