

Rotary Tiller for Soil Preparation

This product is for hard work and site preparation types of agricultural machinery, mainly for dry land, paddy field of rotary operation.

Product Overview

Versatile Rotary Tiller for Professional Agriculture

This diesel-powered rotary tiller is a robust solution designed for efficient soil preparation in both dry land and paddy fields. Its all-gear drive system minimizes power loss, while the durable ductile iron gearbox ensures longevity and high-intensity performance. Compact and flexible, it is perfectly suited for use in plains, hilly regions, orchards, and tea plantations.

Performance Metrics

Productivity

50 ha/h

Productivity

100 mm

Tillage Depth

1350 mm

Tillage Width

Technical Specifications

Physical Data

Feature	Specification
Weight	132 kg
Power Type	Diesel
Product Status	New

Versatility & Usage

Multi-function Capability

- Pumping
- Power generation
- Spraying
- Trenching
- Earthwork
- Short-distance transport

Suitable Environments

Dry Land, Paddy Fields, Orchards, Vegetable Farms, Tea Plantations, Tobacco Fields
