Product Overview

Compact Rotary Tiller Solution

The TL series rotary tiller is a robust, compact implement engineered for precision soil preparation in vineyards, orchards, and vegetable crops. Designed specifically for hobby farmers and small-scale agricultural operations, it combines a sturdy frame with low power requirements. This tiller ensures optimal seedbed preparation and effective weed control through its efficient rotor design and adjustable working settings.

Technical Specifications

Safety Features

- Protective cover
- Shear bolt protection
- Operator guards and shields

Available Models

TL85, TL95, TL105, TL115, TL125, TL135

Mounting System

Three-point linkage

Operational Features

Adjustment Capabilities

- Adjustable working depth
- Adjustable rear leveling flap
- Adjustable skids/wheels

Recommended Use

Vineyards • Orchards • Vegetable Crops • Gardening
