

Rotary Tiller for Soil Preparation

This product is for hard work and site preparation types of agricultural machinery. It is mainly for dry land, paddy field of rotary operation.

Product Overview

Professional Soil Preparation Solution

This diesel-powered rotary tiller is a robust agricultural machine designed for high-efficiency operation in dry lands and paddy fields. Featuring an all-gear drive system and a durable ductile iron gearbox, it provides exceptional power transfer and long-term reliability. Its compact, flexible structure makes it highly adaptable for use in plains, hilly areas, and orchards.

Technical Specifications

Tillage Width	1350 mm
Tillage Depth	100 mm
Machine Weight	132 kg
Productivity	50 ha/h
Power Type	Diesel

Design & Build

Drive System	All-gear drive
Clutch System	Wet friction plate clutch

Applications

Target Terrains	Dry land, Paddy fields, Orchards, Vegetable fields, Tea gardens, Tobacco areas
-----------------	--

Versatility

Additional Capabilities

- Pumping
- Power generation
- Spraying
- Trenching
- Earthwork
- Short-distance transport
