

Rotary Tool Abrasive Sleeves

Abrasive sleeves are designed for use with rotary tools and sanding drums. Constructed from durable abrasive material, they provide effective material removal and surface finishing for various applications.

Product Overview

High-Performance Abrasive Sleeves

These abrasive sleeves are engineered for precision material removal and surface finishing when paired with rotary tools and sanding drums. Constructed from durable abrasive materials, they are versatile enough for shaping, smoothing, and deburring tasks across wood, metal, and plastic substrates. Available in a range of grit sizes and diameters, they provide a reliable solution for diverse industrial and workshop sanding applications.

Technical Specifications

Primary Applications

- Material removal
- Surface finishing
- Shaping
- Smoothing
- Deburring

Compatible Materials

Wood, Metal, Plastic

Tool Compatibility

Rotary tools and sanding drums
