

# Rotary Vane Pump for Fuel Transfer

This rotary vane pump is designed for gasoline and gas transfer applications. It features robust construction for durability and reliable performance in demanding environments.

## Product Overview

### Rotary Vane Pump for Fuel Transfer

This rotary vane pump is engineered specifically for gasoline and fuel transfer applications. Its robust construction ensures durability and reliable performance even in demanding industrial environments. Designed for efficiency, it is an ideal component for fuel dispensing systems requiring consistent and safe fluid transfer.

## Technical Specifications

Model Number	408-0214-001003
Series Identifier	V120.11T

## Application & Usage

Primary Applications	Gasoline Transfer, Fuel Dispensing Systems, Industrial Fluid Transfer
----------------------	---

## Design & Build

Pump Mechanism	Rotary Vane
Construction	Robust construction for durability
