

# Rotating Disc Rubber Cutting Machine

This rotating-disc type cutting machine is designed for processing natural, synthetic, and reclaimed rubber. It cuts rubber blocks into slices, granules, and bars, and can also process other materials.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Rubber Processing

This rotating-disc cutting machine is engineered for the efficient processing of natural, compound, reclaimed, and synthetic rubber blocks. It features a robust design that allows for precise cutting into various forms including blocks, slices, granules, and bars. The machine utilizes a hydraulic-controlled worktable with self-lubricating moving parts to ensure minimal friction and extended service life.

**Machine Type**

Rotating-disc rubber cutting machine

## Technical Specifications

Appears In The Detail Contributes To Extraordinary Quality

### Key Performance Metrics

**50 r/min**

Rotational Speed

**5 Mpa**

Working Pressure

### Comparison Table

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Power Consumption	4+2.2kw	4+2.2kw
Production Capacity	2t/h	3t/h

## Applications

### Output Forms

- Blocks
- Slices
- Granules
- Bars

### Compatible Materials

Natural Rubber, Compound Rubber, Reclaimed Rubber, Synthetic Rubber
