

Rotating Grip Bicycle Shifters

These bicycle shifters use a rotating grip for selecting gears on multi-speed internal hub systems. Numbered indicators display the current gear position.

Product Overview

Precision Gear Shifting

These rotating grip bicycle shifters are engineered for smooth and reliable gear transitions, making them an ideal choice for multi-speed internal hub systems. The ergonomic twist-grip design allows riders to easily select their desired gear while maintaining a secure hold on the handlebars. With clear numbered indicators, riders can quickly verify their current gear position for optimal performance and comfort.

Technical Specifications

Gear Range	7 gears
