

Rotating Hard Surface Floor Cleaner Attachment

This is a rotating floor cleaner attachment for use on hard surfaces. It is designed to connect to pressure washers or similar cleaning systems.

Product Overview

Professional Hard Surface Cleaning Solution

This rotating hard surface floor cleaner attachment is engineered for efficient and thorough cleaning of driveways, patios, and garage floors. Designed to connect seamlessly with pressure washing systems, the rotating head mechanism ensures consistent coverage and superior debris removal compared to standard nozzles. Its durable construction and circular cleaning base make it an essential tool for maintaining large outdoor hard surfaces.
