

Rotating LED Warning Light

This rotating LED warning light provides a visual alert with three flashing functions. It is constructed with a PC lens and ABS base, and is designed for 12-24V DC operation.

Product Overview

Professional LED Warning Light

This high-intensity rotating LED warning light is designed for demanding industrial and automotive safety applications. Featuring a durable polycarbonate lens and a robust ABS base, it provides exceptional visibility in hazardous conditions. The unit is equipped with 40 high-performance 5730 LED chips and offers versatile operation across 12-24V DC systems.

Technical Specifications

High-visibility warning light suitable for emergency vehicles and industrial safety zones.

Working Voltage	12-24V DC
Light Source	40 chips
Ingress Protection	IP65
Lens Colors	Amber, Blue, Orange, Red

Construction & Design

Durable design featuring high-impact resistant materials for extreme industrial conditions.

Material Composition

- PC Lens
- ABS Base

Mounting Method

Magnet with cigar lighter plug

Logistics & Warranty

Warranty

12 months

Unit Packaging

20 PCS/CTN
