

Rotavator Case Bearing LH for DH246F

This LH case bearing is designed for DH246F heavy plus rotavators. It ensures optimal performance during soil preparation.

Product Overview

Precision Case Bearing for Rotary Cultivators

This Left-Hand (LH) case bearing is specifically engineered for DH246F Heavy Plus rotary cultivators, ensuring robust performance in demanding agricultural environments. Precision-manufactured for seamless integration, this component is built from high-durability materials to promote an extended service life and reliable operation during intensive soil preparation tasks.

Technical Details

High-quality spare parts essential for rotary cultivator maintenance and performance.

Compatible Model	DH246F Heavy Plus
Orientation	Left Hand (LH)
Application	Rotary Cultivator, Soil Preparation, Agricultural Machinery

Quality Standards

Key Performance Attributes

- High-durability construction for extended service life
- Robust housing with integrated mounting points
- Precision-engineered for optimal compatibility
- Designed for intensive agricultural use
