

# Rotavator Shaft Disc Furrow Spare Parts

These are replacement parts for rotavator shaft disc furrows. They are compatible with the Dh246f Heavy Plus rotary cultivator.

## Product Overview

### High-Performance Rotavator Components

These precision-engineered spare parts are specifically designed for the Dh246f Heavy Plus rotary cultivator system. Built for durability in rigorous agricultural environments, these components ensure consistent soil preparation, efficient furrowing, and long-lasting machinery performance. Ideal for professional farming operations looking to maintain optimal equipment uptime and productivity.

## Compatibility

### Included Components

- Shaft
- Disc
- Furrow parts

### Compatible Machinery

Dh246f Heavy Plus

## Technical Specifications

Essential components for maintaining and repairing shaft, disc, and furrow systems.

### Primary Applications

- Soil preparation
- Cultivation
- Furrowing

### Performance Features

**1 High**

Wear Resistance

**1 Optimized**

Operational Efficiency
