

Rough Terrain Pallet Truck 1000kg Capacity

This pallet truck is designed for use on rough terrain where ordinary pallet trucks cannot operate. Its pneumatic tires allow for easy movement on uneven surfaces, accommodating various types and sizes of pallets without the need for a forklift.

Product Overview

Rough Terrain Mobility

This high-quality pallet truck is specifically engineered to operate in challenging environments where standard equipment fails. Featuring large 437mm pneumatic tires, it allows for seamless movement over uneven surfaces, eliminating the need for a forklift in many outdoor or construction settings. The design combines a robust, lightweight tubular steel frame with an intuitive hydraulic system, ensuring reliable performance and ease of use for professional operators.

Key Features

Operational Highlights

- Rough terrain capability with pneumatic tires
- Robust and lightweight tubular steel frame
- Adjustable fork width
- Simple three-position control handle (raise, neutral, lower)
- Sealed bearings on wheels
- Minimal push/pull force required
