

## Round Bar Stock (8-60)

This round bar stock is available in diameters ranging from 8 to 60mm. It is precision-engineered for dimensional accuracy and structural integrity, making it suitable for molds, machinery components, and general manufacturing.

### Product Overview

#### Industrial Round Bar Stock

This high-quality round bar stock is precision-engineered to provide exceptional dimensional accuracy and structural integrity for demanding industrial applications. It is specifically designed for use in the manufacturing of tools, dies, and rolls. Available in a versatile range of diameters from 8mm to 60mm, this stock is suitable for diverse engineering and machining requirements.

### Specifications

Diameter Range	8mm - 60mm
Primary Applications	Tools, Dies, Rolls, Machining, Molds, Machinery Components

### Technical Details

#### Available Material Grades

- EST
- H13
