

Round Blade Metal Shovel with D-Grip Handle

This metal shovel is made with a round blade and a D-grip handle. Constructed from robust steel, the shovel is designed for digging, scooping, and moving materials such as soil, gravel, and snow.

Overview

Professional Grade Round Blade Shovel

This durable metal shovel features a round blade design, making it an essential tool for digging, scooping, and moving heavy materials like soil, gravel, and snow. Engineered for efficiency, the extended handle provides superior leverage to reduce physical strain during intensive tasks. The ergonomic D-grip handle ensures a secure and comfortable hold, making it an ideal choice for landscaping, construction, and gardening professionals.

Physical Attributes

Blade Shape	Round
Handle Type	D-Grip
Material Construction	Robust Steel, Metal
