

Round Current Transformer 60/5 75/5A Class 0.5

This tape wrapping current transformer comes in a range of six standard silicon steel core frames. It is widely used and can be configured with or without a foot and plastic cover.

Product Overview

High-Efficiency Current Transformer

This round current transformer utilizes a high-quality silicon steel core, offering a cost-effective solution for precise current measurement. Designed with versatility in mind, the unit features a tape-wrapped construction and is available in configurations with or without mounting feet and plastic covers. It is engineered to deliver reliable performance in various power monitoring and control applications.

Technical Specifications

Current Ratio

60 A

Primary Current

75 A
