Product Overview

Professional Round Head Copper Hammer

This round-type copper hammer is engineered for precision tasks requiring non-sparking and non-marring impact. Featuring a solid copper head for effective force transmission, it is an essential tool for automotive, metalworking, and assembly applications. The design prioritizes safety in hazardous environments while protecting delicate workpieces from damage.

Technical Specifications

Weight Range	1LB - 20LB
Head Material	Copper

Key Features

Design Benefits

- Shock-absorbing handle
- Ergonomic grip
- Reduced vibration
- Round head design

Safety Features

Non-sparking, Non-marring

Applications

Recommended Uses

Automotive • Metalworking • Assembly
