Product Overview

Versatile Construction Fasteners

These high-quality round iron and steel nails are designed for a wide range of construction applications, from fixing wood components to securing asbestos or plastic tiles. Manufactured from high-strength or low-carbon steel, they offer a balance of hardness and ease of use to meet diverse structural needs. With multiple finishing options like galvanization and polishing, these nails provide reliable performance in various environmental conditions.

Place of Origin

Gaomi City, China

Technical Specifications

Shank Variations

- Plain shank
- Twisted shank
- Screw shank

Surface Treatment

Galvanized • Polishing

Available Materials
