

Round Nose Pliers with Insulated Handles

These round nose pliers are designed for precision work, such as bending and shaping wire. They feature insulated handles, a polished steel head, and ergonomic grips for comfort and control.

Product Overview

Precision Round Nose Pliers

These round nose pliers are engineered for precision tasks, specifically designed for bending and shaping wire with accuracy. Featuring a high-quality polished steel head, they offer durability and consistent performance for professional applications. The inclusion of ergonomic, insulated handles ensures both user comfort during extended use and essential protection.
