

Round Point Shovel with Ash Wood Handle

This round point shovel features a durable steel blade and a long, sturdy ash wood handle. It is ideal for digging, moving, and lifting various materials in gardening, landscaping, and construction applications.

Product Overview

Professional Grade Round Point Shovel

This round point shovel is engineered for heavy-duty digging, lifting, and material transport in construction and landscaping environments. Featuring a high-quality steel blade with a 1.8mm thickness, it offers excellent durability and structural integrity under pressure. The long ash wood handle provides superior leverage and natural grip comfort, while the non-slip step design ensures safe and efficient operation during prolonged use.

Technical Specifications

Blade Thickness	1.8 mm
Steel Hardness	47 HRC
Blade Coating	Powder Coating

Design Features

Step Type	Non-slip Step
Blade Profile	Concave and Convex Stamped
Handle Material	Ash Wood

Identification

Model Number	MJ05-6SL
