

Round Point Steel Shovel Head

This round point shovel head is designed for gardening and landscaping. Constructed from high-quality steel, it offers excellent strength and resistance to wear, facilitating easy digging in various soil types for planting, transplanting, and general digging.

Product Overview

Professional Round Point Steel Shovel Head

The S510-1 is a high-performance round point shovel head engineered for demanding gardening and landscaping environments. Crafted from premium, durable steel, this tool offers exceptional structural integrity and long-term wear resistance. Its optimized round point geometry ensures effortless soil penetration across a wide range of terrains, making it an ideal choice for planting, transplanting, and large-scale digging operations.
