

Round Point Steel Shovel

This round point shovel is designed for digging, planting, and moving materials. It features a durable steel blade and a comfortable handle for efficient use in gardening and landscaping.

Product Overview

Professional Grade Digging Tool

This heavy-duty round point steel shovel is engineered for professional gardening and landscaping environments. It is specifically designed to facilitate efficient digging, material transfer, and ground preparation tasks. The durable steel construction ensures long-term reliability for challenging tasks such as trenching, edging, and transplanting.

Technical Details

Key Features

- Round point blade profile
- Reinforced steel blade construction
- Ergonomic handle design for user comfort
- Optimized for material movement and soil penetration

Primary Applications	Gardening, Landscaping, Breaking Ground, Edging, Transplanting
Material	High-durability steel
