

Round Ring Lifting Chain

This round ring chain is designed for various industrial and lifting applications. It is constructed from durable alloy steel and offers excellent wear resistance and load-bearing capacity.

Product Overview

High-Strength Industrial Lifting Solution

This round ring lifting chain is engineered for demanding industrial environments requiring robust load-bearing capabilities. Constructed from high-grade alloy steel, the chain features precisely formed and welded links that ensure consistent performance and maximum reliability under stress. Its design provides excellent wear resistance, making it an ideal component for integration into heavy-duty machinery such as cranes and hoist systems.

Technical Specifications

Primary Applications

- Hoists
- Cranes
- Heavy-duty machinery

Compliance

Industry Standards Compliant

Material

Durable Alloy Steel

Key Features

High Strength, Wear Resistant, Precisely Welded, Industrial Grade
