

# Round Steel Lifting Clamp

This clamp is designed for horizontal lifting of round steel objects. It features a robust construction for secure gripping and reliable performance in industrial environments.

## ADDITIONAL IMAGES

## Product Overview

### Professional Round Steel Lifting Solution

This round steel lifting clamp is engineered for safe and reliable horizontal lifting of cylindrical steel materials. It features a compact, lightweight structure that facilitates convenient installation and rapid adjustment of the clamping rail width. Designed for industrial efficiency, the clamp ensures secure handling for demanding environments.

## Key Features

### Certifications

CE • GS • TUV • Rheinland

### Operational Benefits

- Safe and reliable operation
- Compact and lightweight structure
- Fixed hanging beam design
- Quick adjustment of clamping rail width

## Technical Specifications

Primary Application	Horizontal lifting of round steel
Material	High-strength steel
Finish	Corrosion-resistant orange coating
Clamping Mechanism	Scissor-action
