

# Router Bit Set for Woodworking

This comprehensive router bit set is designed for diverse woodworking tasks. It includes bits with various profiles like straight, round over, cove, and dovetail, suitable for edge forming, trimming, and grooving.

## Product Overview

### Professional Woodworking Router Bit Set

This comprehensive router bit set is engineered for versatile woodworking applications, including edge forming, trimming, grooving, and decorative profiling. Each bit features precision-ground carbide edges that deliver clean, accurate cuts across hardwood, softwood, and composite materials. Designed for durability and stability, the hardened steel shanks effectively minimize vibration during heavy-duty operation. The entire collection comes securely housed in a fitted wooden case, ensuring organized storage and quick selection.

## Technical Specifications

### Compatible Materials

- Hardwood
- Softwood
- Composite materials

### Included Bit Profiles

Straight, Round Over, Cove, Dovetail, Chamfer

## Construction Quality

### Performance Benefits

Reduced vibration • High durability • Clean cut finish

### Cutting Edge Material

Precision-ground carbide

### Shank Material

Hardened steel

## Storage and Organization

### Case Type

Fitted wooden case
