

Router Bit Set with Profile Cutters

This set contains metal cutting router bits with various profile cutters. They are stored in a wooden case with foam inserts and diagrams of each bit's cutting profile.

Product Overview

Professional Profile Cutting Set

This versatile router bit set is designed for precision metal cutting applications. The kit includes three distinct profile cutters, each engineered for specific shaping tasks. Organized in a protective wooden storage case with a foam insert, these tools ensure secure transport and easy access for workshop environments.
