

Router Bit Set with Wooden Case

This router bit set is presented in a wooden case with a black foam insert. The set includes two router bits with red cutting edges and silver shanks, each with a diagram illustrating its profile and dimensions.

Product Overview

Precision Router Bit Set

This router bit set is engineered for high-performance metal cutting applications. The set is neatly organized in a durable wooden case with a protective foam insert, ensuring the bits remain secure and protected during storage or transport. Designed for professional use, these tools provide reliable cutting profiles for various machining tasks.

Primary Application

Metal Cutting
