Product Overview

Industrial Rubber Bale Cutting Solution

This rotating-disc cutting machine is engineered for the high-precision processing of various rubber types, including natural, synthetic, compound, and reclaimed rubber. It effectively reduces large rubber bales into manageable blocks, slices, granules, or bars to optimize downstream production. Designed for industrial longevity, the machine features a robust hydraulic system and self-lubricating components to minimize friction and ensure consistent performance.

Technical Specifications

Model Specifications

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Rotational Speed	50r/min	50r/min
Power Rating	4+2.2kw	4+2.2kw
Working Pressure	5Mpa	5Mpa
Production Capacity	2t/h	3t/h
