

# Rubber Block Cutting Machine

This rotating-disc cutting machine efficiently processes natural, reclaimed, and synthetic rubber. It cuts rubber blocks into various shapes, including slices, granules, and bars.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Rubber Cutting Solution

This rotating-disc cutting machine is engineered for the high-efficiency processing of natural, synthetic, reclaimed, and compound rubber blocks. The equipment is designed to transform large rubber bales into manageable slices, granules, bars, or smaller blocks with precision. Its robust construction and hydraulic system ensure reliable, continuous performance in demanding industrial rubber processing facilities.

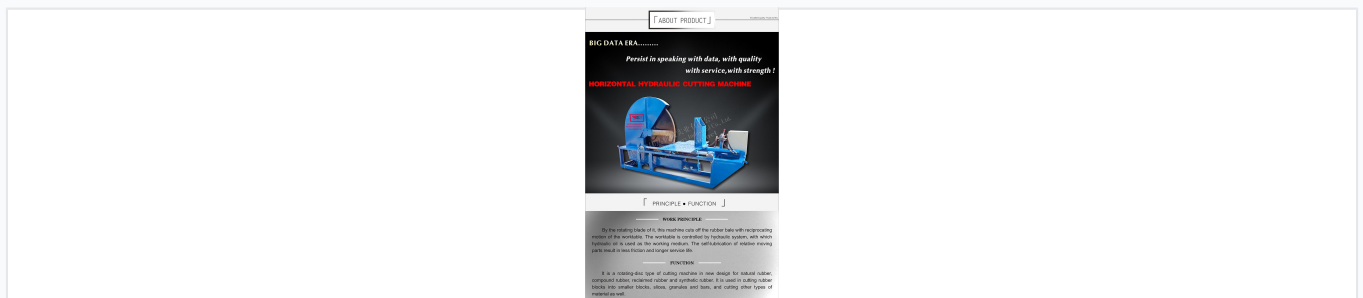

## Technical Specifications

## Model Specifications

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Rotational Speed	50r/min	50r/min
Power	4+2.2kw	4+2.2kw
Working Pressure	5Mpa	5Mpa
Capacity	2t/h	3t/h

## Performance & Features

## Design Advantages

- Rotating-disc blade design for clean cuts
- Reciprocating worktable movement via hydraulic system
- Self-lubricating moving parts for extended service life
- High production capacity up to 3t/h

## Processing Capabilities

Natural Rubber, Compound Rubber, Reclaimed Rubber, Synthetic Rubber, Block Cutting, Granule Production, Slice Cutting
