

# Rubber Block Cutting Machine

This rotating-disc cutting machine is designed for processing natural, reclaimed, and synthetic rubber. It cuts rubber blocks into smaller blocks, slices, granules, and bars.

## ADDITIONAL IMAGES

## Product Overview

Rotating-disc cutting machine designed for precision rubber processing.

## Professional Rubber Cutting Solution

This rotating-disc cutting machine is engineered for the efficient processing of various rubber types, including natural, compound, reclaimed, and synthetic rubber. Designed for industrial workflows, it enables precise cutting of rubber blocks into versatile forms such as slices, granules, and bars. The system emphasizes ease of operation and reduced manual intervention, ensuring consistent output and improved productivity for rubber processing facilities.

## Technical Specifications

### Model Specifications

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Production Capacity	2t/h	3t/h
Rotational Speed	50r/min	50r/min
Power Rating	4+2.2kw	4+2.2kw
Working Pressure	5Mpa	5Mpa

## Capabilities

RAW MATERIAL • PRODUCTS

We not only have professional products but also have an excellent effect

### Raw Material

### Products

Demonstration of the machine's capability to process various rubber materials into usable forms.

### Supported Materials

Natural Rubber, Compound Rubber, Reclaimed Rubber, Synthetic Rubber

### Output Forms

Blocks, Slices, Granules, Bars
