

Rubber Block Cutting Machine

This rotating-disc type cutting machine is designed for natural, reclaimed, compound, and synthetic rubber. It cuts rubber blocks into smaller blocks, slices, granules, and bars, and can also process other materials.

ADDITIONAL IMAGES

Product Overview

Industrial-grade horizontal cutting machine for high-precision rubber processing.

Industrial Rubber Processing

This rotating-disc cutting machine is designed for efficient processing of natural, compound, reclaimed, and synthetic rubber. It reliably transforms large rubber bales into smaller blocks, slices, granules, or bars. Engineered for high performance and durability, this machine utilizes a hydraulic system for smooth operation and consistent results in industrial environments.

Machine Type

Rotating-disc horizontal hydraulic cutting machine

Technical Specifications

Detailed structural components designed for precision cutting and stability.

Performance Overview

50 r/min

Blade Speed

5 Mpa

Working Pressure

Model Comparison

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Capacity	2t/h	3t/h
Power Input	4+2.2kW	

Features & Materials

Output Forms

- Blocks
- Slices
- Granules
- Bars

Compatible Materials

Natural Rubber, Compound Rubber, Reclaimed Rubber, Synthetic Rubber
