

Rubber Block Cutting Machine with Rotary Disc

This machine is designed for cutting rubber blocks into various shapes. It utilizes a rotating disc to process natural, compound, reclaimed, and synthetic rubber.

ADDITIONAL IMAGES

Product Overview

Heavy-duty rotating disc machine for industrial rubber processing.

High-Efficiency Rotary Disc Cutting

This rotating-disc cutting machine is engineered for the precision processing of various rubber materials including natural, compound, synthetic, and reclaimed rubber. It utilizes a hydraulic system to control worktable motion, delivering consistent cutting results for blocks, slices, granules, and bars. Designed for industrial durability, this machine streamlines production by offering high throughput and reliable, well-distributed cutting performance.

Technical Specifications

Clear view of the cutting guide, worktable, and integrated control systems.

Performance Metrics

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Production Capacity	2t/h	3t/h
Rotational Speed	50r/min	50r/min
Power	4+2.2kw	4+2.2kw
Working Pressure	5Mpa	5Mpa

Output Formats

- Blocks
- Slices
- Granules
- Bars

Compatible Materials

Natural Rubber, Compound Rubber, Reclaimed Rubber, Synthetic Rubber
