Product Overview

Industrial Rubber Cutting Solution

This rotating-disc cutting machine is engineered for the precise processing of natural, synthetic, reclaimed, and compound rubber blocks. The design allows for versatile output, enabling the conversion of large rubber blocks into smaller segments, slices, granules, or strips. Featuring robust hydraulic controls and a water-cooling system, this machine ensures efficient, dust-reduced operation in high-volume industrial settings.

Technical Specifications

Operational Performance

50 r/min

Blade Rotation Speed

5 Mpa

Working Pressure

Model Specifications

Feature	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Power Rating	4+2.2kw	4+2.2kw
Capacity	2t/h	3t/h

Design Advantages

- Rotating-disc cutting mechanism
- Integrated hydraulic control system
- Water-cooling blade system
- Self-lubricating moving parts for extended service life

Product Features

Cutting Capabilities

- Blocks
- Slices
- Granules
- Bars

Compatible Materials

Natural Rubber, Synthetic Rubber, Reclaimed Rubber, Compound Rubber
