

Rubber Cold Feed Extruder

This cold feed extruder is designed for continuous rubber processing. It features a robust frame and a secure extrusion head for heavy-duty industrial applications.

Product Overview

Industrial Rubber Cold Feed Extruder

This high-performance cold feed extruder is engineered specifically for demanding rubber processing applications. Featuring a robust, heavy-duty frame and precision-engineered cylindrical components, it ensures consistent and reliable output. The design prioritizes operator safety with an integrated enclosure and is built for continuous industrial operation.

Technical Specifications

Process Method

Cold Feed

Key Design Features

- Robust green-painted frame
- Precision cylindrical components
- Heavy-duty industrial construction
- Integrated safety enclosure

Extrusion Head Details

Component	Description
Head Material	Silver-colored metal
Attachment	Multi-bolt secure fastening

Application	Rubber processing
