

Rubber Hydraulic Hose

This rubber hydraulic hose is designed for high-pressure applications in industrial and mining machinery. Constructed from durable rubber compounds, it offers excellent resistance to abrasion, chemicals, and extreme temperatures.

Product Overview

High-Pressure Hydraulic Solutions

These professional-grade rubber hydraulic hoses are engineered for demanding industrial and mining environments. Compatible with a wide range of fluids including hydraulic oil, fuel, emulsions, and glycol, they offer versatile performance across varied applications. The durable construction ensures reliable operation under extreme pressure and temperature conditions.

Technical Specifications

Supported Series	R1, R2, 1SN, 2SN, 4SP, 4SH, R9, R10, R12, R13, R15
Operating Temperature Range	-40°C to +120°C (Cold-resistant options available down to -55°C)

Performance Standards

Performance Capacity

60 MPa

Max Rated Pressure (R2 Series)

42 MPa

Max Rated Pressure (4SH Series)

Compliance Standards

- GB/T3683-2011
- GB/T10544-2003
- MT/T98-2006
