

Rubber Injection Molding Machine

This injection molding machine is designed for rubber processing. It is ideal for manufacturing rubber products with precision and efficiency.

Product Overview

High-Efficiency Rubber Injection Molding

This industrial rubber injection molding machine is engineered for precision and high-volume production efficiency. Designed with a robust frame and advanced control systems, it provides consistent results for complex rubber component manufacturing. Its integrated material hopper ensures a smooth, continuous supply of rubber compound for optimal performance in demanding production environments.

Technical Specifications

Clamping Force

160 T

Clamping Force

Core Components

- Material Hopper
- Integrated Control Panel
- Robust Frame

Application

Rubber Processing, Industrial Molding
