

Rubber Lined Pipe Clamp

This pipe clamp features a rubber lining to protect pipes and tubes while offering secure support. It reduces vibration and noise, and includes a screw for easy installation and adjustment.

Product Overview

Rubber Lined Pipe Clamp

This high-quality rubber lined pipe clamp is engineered to provide secure support for pipes and tubes while minimizing vibration and noise transfer. The integrated rubber lining acts as a protective buffer, preventing surface damage to the piping system during installation and operation. Featuring a convenient screw mechanism, this clamp allows for quick, reliable attachment and easy adjustment, making it an essential component for professional plumbing and industrial piping installations.

Technical Features

Key Features

- Rubber lining for surface protection
- Vibration and noise suppression
- Adjustable screw mechanism
- Secure pipe support

Vibration Damping	Yes
Noise Reduction	Yes
Installation	Screw-based attachment
