

Rubber Mallet with Fiberglass Handle

This rubber mallet is designed with a fiberglass handle and rubber grip. The rubber head minimizes surface damage, while the fiberglass handle provides durability and shock absorption for comfortable use.

Product Overview

Professional Rubber Mallet

This durable rubber mallet is specifically designed for applications where a softer impact is required to prevent surface damage. Featuring a high-quality fiberglass handle, it provides excellent shock absorption and strength compared to traditional wood handles. An integrated rubber grip ensures a secure, comfortable hold for long-term professional use in woodworking and automotive repair.

Technical Specifications

Handle Material	Fiberglass
Grip Material	Rubber
Typical Applications	Woodworking, Automotive, General Construction

Product Features

Key Performance Benefits

- Non-marring rubber head for surface protection
- High-strength fiberglass handle for durability
- Shock-absorbing construction to reduce operator fatigue
- Ergonomic rubber grip for secure handling
