

Rubber Mixing Mill

The rubber mixing mill is designed for efficient mixing and processing of rubber compounds. Its adjustable roller gap allows precise control over material thickness and texture.

Overview

Industrial Rubber Mixing Mill

The XK-810 open mixing mill is a robust and reliable machine engineered for the high-efficiency processing and mixing of rubber compounds. Built with a heavy-duty construction and a precision drive system, it delivers consistent material quality for industrial compounding, sheeting, and refining applications. The integrated adjustable roller gap mechanism provides operators with precise control over output thickness and texture, while standardized safety features ensure operational reliability.

Technical Specifications

Model Number	XK-810
Machine Type	Open Mixing Mill

Features

Core Capabilities

- Heavy-duty industrial construction
- Precision-engineered rollers
- Adjustable roller gap for thickness control
- Consistent material compounding
- Sheeting and refining capabilities

Safety

Safety Compliance	Emergency Stop Mechanism, Protective Guards
