

Rubber Mounting Grommet for Cooling Fan

This rubber mounting grommet is designed to secure a cooling fan to a heatsink or computer case. It is made of durable rubber material, offering vibration dampening and noise reduction.

Product Overview

Vibration Dampening Mounting Solution

This rubber mounting grommet is engineered to securely attach cooling fans to heatsinks or computer cases. Constructed from high-quality, durable rubber, it effectively absorbs vibrations and minimizes operational noise, contributing to a quieter computing environment. The design includes a central aperture for standard fasteners and external tabs to ensure a stable, reliable fit across various fan and heatsink configurations.

Physical Properties

Material	Durable Rubber
Vibration Dampening	Yes
Noise Reduction	Yes

Compatibility & Design

Compatibility

- Cooling fans
- Heatsinks
- Computer cases

Mounting Features

Central fastener hole, External mounting tabs
