

Rubber Roller for Industrial Applications

This high-quality rubber roller is designed for diverse industrial applications, including food and beverage machinery. It ensures smooth and efficient operation in processing and handling systems.

Product Overview

Industrial Rice Huller Rubber Roller

This high-performance rubber roller is engineered specifically for industrial food and beverage machinery applications. Designed for superior durability, it provides exceptional wear resistance to ensure smooth, efficient operation in intensive processing environments. The product is manufactured with high precision to meet the rigorous demands of agricultural and industrial handling systems, offering reliable and long-lasting service.

Quality & Compliance

Certifications	ISO 9001:2000
Country of Origin	People's Republic of China

Performance Features

Key Performance Indicators

100 Grade
Wear Resistance

Recommended Applications

- Rice hulling machinery
- Food processing systems
- Beverage production equipment
- Industrial material handling
