

Rubber Splicing Tape

This rubber splicing tape is designed for splicing applications. It is suitable for use in electrical insulation and cable repair.

Product Overview

Self-Amalgamating Rubber Splicing Tape

This self-amalgamating rubber tape is engineered for reliable use as primary electrical insulation. Designed for low-voltage applications, it provides a secure, protective seal for cable repair and splicing. It is a UL-listed solution suitable for professional electrical maintenance and installation tasks.

Technical Specifications

Maximum Voltage	600 V
Maximum Temperature	80 °C
