

Rubber Wheel with Metal Rim

This rubber wheel features a durable rubber tire on a robust metal rim. It is designed for excellent traction and load-bearing capacity in carts, dollies, and other material handling equipment.

Product Overview

Industrial Grade Rubber Wheel

This high-quality rubber wheel is expertly engineered for reliable performance in demanding material handling environments. Featuring a durable rubber tire on a robust metal rim, it offers exceptional load-bearing capacity and consistent traction. The integrated precision bearing ensures smooth operation, making it an ideal choice for carts, dollies, and various industrial equipment.

Technical Specifications

Typical Applications

- Carts
- Dollies
- Material Handling Equipment

Construction Materials

Rubber Tire, Metal Rim
