

Rugged LCD Display Unit

This ruggedized display unit is designed for demanding environments. It features a robust enclosure with integrated handles and secure mounting points.

Overview

Ruggedized Display Solution

The JYL-17N is a ruggedized display unit engineered specifically for demanding operational environments. It features a robust enclosure with integrated handles and secure mounting points, ensuring reliable performance in challenging conditions. With excellent visibility and a high-contrast screen, it is highly suitable for monitoring critical data and video feeds in military, industrial, and aerospace applications.

Key Features

System Advantages

- Superior system function
- Enhanced LCD performance
- Strong environmental adaptation
- Highly functional components
- Convenient operation

Target Applications

Military, Industrial, Aerospace

Design & Build

Design Highlights

Ruggedized Enclosure • Integrated Handles • Secure Mounting Points
