

RV Dome LED Light 12-24V

This 12-24V RV dome light is designed for recreational vehicles and mobile applications. The dual LED configuration provides ample illumination while consuming minimal power.

Product Overview

Versatile RV Lighting Solution

The 12-24V RV Dome Light is a high-performance lighting solution designed specifically for recreational vehicles, trailers, and marine interiors. Featuring 48 high-efficiency SMD2835 LEDs, this unit delivers a bright 560 lumens of illumination while maintaining low power consumption between 6 and 7 watts. Its wide voltage compatibility and adjustable switching options make it a reliable and flexible choice for mobile environments requiring durable, long-lasting interior lighting.

Technical Specifications

Operating Voltage	24 V
Power Consumption	7 W
Luminous Flux	560 LM
Color Temperature	4000-4500K
LED Type & Count	48pc SMD2835

Features

Performance Highlights

560 LM
Brightness

7 W
Max Power

Adjustable Switches	3 switches
