

RV Lithium Battery with BMS

This lithium battery is designed for recreational vehicles and includes a built-in Battery Management System (BMS) with a display. The system provides real-time data on voltage, current, and state of charge.

Product Overview

High-Performance RV Power Solution

This 24V Lithium Iron Phosphate (LiFePO4) battery is engineered specifically for large recreational vehicles, offering robust power storage with a 270Ah capacity. Designed for demanding environments, it features advanced heating functions for reliable operation in temperatures as low as -30°C. With integrated BMS monitoring and high-current capabilities, this unit provides a safe, efficient, and intelligent power upgrade for mobile energy systems.

Technical Specifications

Cell Type	Lithium Iron Phosphate (LiFePO4)
Nominal Voltage	24 V
Capacity	270 Ah

Performance Metrics

Charge & Discharge

100 A Charging Current	300 A Discharge Current
----------------------------------	-----------------------------------

Features & Compatibility

Communication

- RS485
- CAN Bus

Key Features

Built-in BMS, Status Display Screen, Heating Function, Cold-Resistant (-30°C), Parallel Compatible

Physical Properties

Enclosure Material	Cold-rolled sheet spray
Dimensions	Custom made
