

# RV Roof Mount Air Conditioner with Vertical Compressor

This RV air conditioner is designed for roof mounting. It features a vertical compressor for space optimization and enhanced cooling.

## Product Overview

### Professional Cooling for Mobile Living

The KR40C1A roof-mount air conditioner is engineered specifically for recreational vehicles, utilizing an advanced vertical compressor design. This configuration maximizes cooling capacity while optimizing the spatial footprint on the vehicle roof. Built for reliability, this unit provides consistent climate control to enhance comfort during travel and outdoor stays.

## General Information

Model Number	KR40C1A
Installation Method	Roof-mount

## Technical Features

Compressor Design	Vertical Compressor
Key Benefits	Space-Optimized, High Cooling Efficiency, RV Compatible
