Product Overview

Professional RV Roof Lifting Solution

This automated roof lifting mechanism is specifically engineered for reliable RV hatch operation. Constructed from high-strength steel with a corrosion-resistant finish, it provides smooth, controlled movement while ensuring long-term durability in various weather conditions. Its scissor-style design optimizes space efficiency while maintaining high stability during extended use.

Technical Specifications

System Capabilities

- Automatic roof lifting
- Controlled opening and closing
- Ventilation support
- Rooftop accessory stability

Design Mechanism	Scissor-style lift
Material	High-strength Steel, Corrosion-resistant coating
Adjustable Features	Yes

Performance

Key Performance Indicators

1 Grade

Corrosion Resistance
