

S Bent Nose Pipe Wrench

This pipe wrench is designed for gripping and turning pipes and fittings. The distinctive S-shaped jaw allows for a secure hold, while the adjustable mechanism accommodates various pipe diameters.

Product Overview

Professional S-Shape Design

The S-Bent Nose Pipe Wrench is a specialized hand tool engineered for superior access in tight spaces and challenging angles. Featuring a unique S-shaped jaw geometry, it provides an exceptionally secure hold on pipes and fittings while the adjustable mechanism accommodates a range of diameters. Built for durability and comfort, this tool features an ergonomic handle and high-strength construction to ensure reliable performance for plumbing, maintenance, and repair professionals.

Technical Specifications

Key Features

- S-shaped jaw design for optimal access
- Adjustable jaw capacity
- Hardened toothed jaws to prevent slippage
- Ergonomic handle for high leverage and control

Material Composition

Chrome Vanadium

Applications

Primary Applications

Plumbing • Industrial Maintenance • Pipe Repair
